

Future U.S. Transportation Crew Exploration Vehicle (CEV)/Orion

NASA has initiated the development of the Orion Crew Exploration Vehicle (CEV). The first Orion flights are planned for 2012–2014 and will support the ISS.

The CEV approaches the ISS.

Commercial Orbital Transportation Services (COTS)

NASA is seeking commercial providers of launch and return logistics services to support the ISS after the Space Shuttle is retired. The first COTS demonstration missions are planned for 2010.
